

## Applicability Criteria for Revised Technical Requirements

**09/30/2020**

The following applicability criteria are only valid for eligible projects in the Interconnection Queue as of 09/30/2020.

If an interconnection customer who has an existing project in the Interconnection Queue wishes to utilize the updated technical requirements that are effective on 10/01/2020, then the interconnection customer shall contact PSEGLI at “PAMSolarLI@pseg.com” and request a reevaluation under the revised technical requirements. PSEG LI will determine if the project qualifies for reevaluation based on the applicability criteria outlined below:

<b>Phases</b>	<b>Description</b>	<b>Applicable for Reevaluation/Restudy/Redesign (Yes/No)*</b>
Applications received	Study did not commence	Yes
Study Phase	Project is in study phase	Yes
Design	Design Phase Before accepting Cost allocation	Yes
Design	Design Phase & PSEG Long Island did not procure equipment	Yes
Design	Design Phase & PSEG Long Island procured equipment**	Case by Case **
Construction	Projects in Construction Phase	No
* Subject to applicable study costs and interconnection costs		
**Depends on reusability by the same project and if the orders can be cancelled		
Note: If project is in the Design/Construction phase and did not order the SCADA communication line, please contact your PSEG Long Island Power Asset Management contact for reevaluation to determine if the SCADA modifications are applicable.
