May 2026

Dear PSEG Long Island Account Holder:

PSEG Long Island is committed to helping homeowners improve comfort and lower energy use with smart energy upgrades. I'm writing to let you know about incentives that may be available to help you replace your cooling and heating equipment with a high-efficiency electric heat pump system.

You may be checking to see if your central air-conditioning unit is ready to tackle another year. At some point, we all will need to get a new system. If this is the year for you – don't just replace it – look at upgrading to a whole-house electric heat pump system.

A heat pump is an all-in-one solution that provides both cooling and heating through a single system. Heat pumps use significantly less energy, deliver consistent comfort year-round, and become one investment in your home for both cooling and heating. Many homeowners also appreciate the quieter operation, improved indoor air quality, and the peace of mind that comes with upgrading to modern, efficient technology.

PSEG Long Island is currently offering **rebates of up to \$4,000** for qualifying systems, when installed by a participating PSEG Long Island partner. You may also be eligible for additional rebates if you live in a state-designated disadvantaged community or if you meet New York's income eligibility guidelines.

Getting started is easy. A PSEG Long Island participating contractor can guide you through equipment selection, installation, and the rebate application process. To find a participating contractor, **scan the QR code.**

If you have a trusted contractor that is not a PSEG Long Island approved partner, we can help them become one. Have them reach out at the email address below and we'll guide them through the process.

If you have questions or would like additional information, please contact the PSEG Long Island Energy Infoline at **1-800-692-2626** or email HomeComfortLI@pseqliny.com.

Don't miss this opportunity to improve your home's comfort and efficiency while taking advantage of available incentives. We encourage you to explore your options today.

John Franceschina

Senior Director, PSEG Long Island Energy Efficiency Program
