# PSEG LONG ISLAND COMMERCIAL EFFICIENCY PROGRAM PROGRAM ANNOUNCEMENT

**Document #: CEP 2022-05**  
**Announcement Date: July 6, 2022**

**RE: DLC Version 5.1 Products**

Energy Efficiency Program Participants:

The PSEG Long Island Commercial Efficiency Program (CEP) has a longstanding policy of utilizing the Design Lights Consortium (DLC) as the rating agency for our Solid-State Lighting (SSL) programs. Only those products that are listed on the DLC Qualified Products List (QPL) are eligible for CEP rebates.

As of Friday July 1, 2022, the DLC has updated the SSL Technical Requirements to Version 5.1. The high-level summary of the changes from v5.0 to v5.1 are as follows:

- New color quality requirements to help provide good color rendering with better color consistency over time
- Updated glare requirements for DLC premium fixtures
- Virtually all listed products will have dimming capability

A full list of changes can be found at this link: [DLC V5.1 Updates](#)

With the new requirements and specifically the dimming capability, DLC will be delisting approximately 411,000 out of 680,000 products.

Given the ongoing supply chain issues, as well as inflation and labor challenges,

**PSEG Long Island's CEP Lighting programs will allow DLC SSL v5.0 products until September 30, 2022.**

Questions or concerns with program updates should be directed to the Commercial Efficiency Program Mailbox [CEPLI@pseg.com](mailto:CEPLI@pseg.com), your Energy Consultant/Project Specialist, or to the PSEG Long Island Infoline (800-692-2626).
