Subject: PSEG Long Island EV Make Ready Program Announcement - Limited-Time Bonus Incentive for Projects Completed in 2026
Date: November 2, 2026

Hello,

As we enter the final months of the year, our focus remains not only on achieving the EV Make Ready Program's performance metrics, but also on maximizing incentive opportunities for our participating contractors.

To help drive project completion and provide additional value, we are pleased to announce a **2026 EV Make Ready Bonus Incentive** for contractors whose approved projects are fully completed and closed out in 2026.

As of November 1st, in addition to the project's existing pre-approved incentive, eligible projects will receive:

- **$1,000 additional incentive per port** for **DC Fast Charging (DCFC)** installations
- **$250 additional incentive per port** for **Level 2 (L2)** charging installations

This bonus is intended to encourage timely project completion and help contractors take full advantage of available program funding.

If your project is currently underway, we encourage you to work closely with the project team to ensure that all required milestones, documentation, and closeout requirements are completed in time for project closeout by the end of 2026.

All closeout documentation must be submitted no later than Monday, December 7, 2026, by close of business (COB), to qualify for the bonus incentive.

Note that this application must be submitted through the Partner Portal. Instructions are included in the application. We will not accept applications via email.

If you have any questions regarding project eligibility or closeout requirements, please contact the program team at **PSEG-LI-EVMakeReady@psegliny.com**.

Thank you for your continued participation in the EV Make Ready Program and for your commitment to advancing transportation electrification across Long Island.
