

2018

COMMON RESIDENTIAL ELECTRIC RATES

The rate you are currently billed under is listed on your bill. Please review this entire guide to determine which rate is best suited for you. You may have made significant changes in the way you use electricity at your home and may find another rate more appropriate.

Please note that the charges shown in this guide do not include various adjustments that PSEG Long Island includes in its bill. It is important to note that your bill also includes a Power Supply Charge at a cost per kWh basis. For a further explanation, see the sections regarding “Additional Information” and “Other Charges.”

Religious organizations, veterans organizations and qualified community residences may choose service under an appropriate residential or non-residential service classification, subject to a minimum term of one year.

If you would like further information, please call **1-800-490-0025** or visit our Web site at **www.psegliny.com**

Important information, keep for your records.

What Makes Up the Cost of Electric Service?

The total cost of electric service is made up of various charges. The two most significant are:

- Delivery & System Charges –
the cost to bring electricity to you
- Power Supply Charges –
the cost of the electricity you've used

When we talk about PSEG Long Island's "rates," this refers only to **Delivery & System Charges**. Unlike the cost of power, these charges do not fluctuate with market conditions and are set by the Long Island Power Authority. The Delivery & System Charges also include certain transition charges collected on behalf of the Utility Debt Securitization Authority and a daily service charge. This "Basic Service" charge is simply the very minimum cost to provide a 24/7 connection to the electric system.

The **Power Supply Charge** is subject to fluctuations that occur in the energy marketplace. PSEG Long Island does not own power generation facilities. Therefore, as with all other electric utilities in New York State, PSEG Long Island purchases the power necessary to meet our customers' needs, including an appropriate reserve margin. This cost is made up of both power purchased directly and the cost of fuel used to generate electricity. In addition to appearing on your bill, the current Power Supply Charge can be found at www.psegliny.com.

The electric rate on your bill is determined by what you use electricity for. The following pages provide detailed descriptions of our rates and their pricing. Compare the rate shown on your bill with its description here to ensure that you are billed under the correct rate.

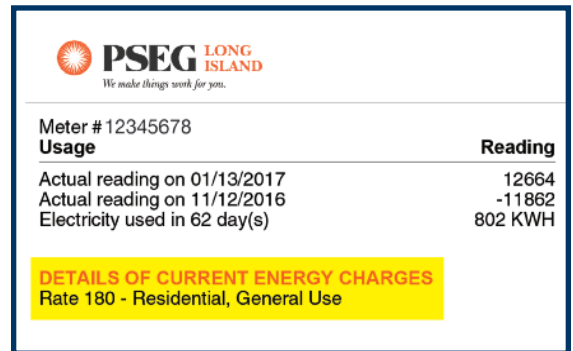

For the other charges included in your bill see page 10.

Common Residential Electric Rates

For most customers, electricity rates are based on what is considered "general" use, in other words, powering your lights, electric appliances and devices. Some customers use electricity for home and/or water heating in addition to general use. Rates typically vary by the time of year (i.e. summer vs. winter), but not by the time of day electricity is used.

As an option to customers, PSEG Long Island does offer "time-of-use" rates that factor in the time of year *and* time of day electricity is being used. These rates could work for you if you can shift a high percentage of your electric usage to "off-peak" hours. Off-peak pricing can offer savings, but peak pricing can be as much as two times our standard rates. That's why these rates are not right for everyone.

Your rate is shown on the back of your bill in the "Details of Current Energy Charges" section.

We make things work for you.

Meter # 12345678	
Usage	Reading
Actual reading on 01/13/2017	12664
Actual reading on 11/12/2016	-11862
Electricity used in 62 day(s)	802 KWH

DETAILS OF CURRENT ENERGY CHARGES
Rate 180 - Residential, General Use

The following pages contain descriptions of our most common residential rates. For rate pricing, see page 8.

Standard Rates

If your account is billed on a discounted Household Assistance Rate, the rate number is preceded by a "D" and the rate description will include "Household Assistance."

Rate 180/D180 - Residential, General Use

Applies to customers who use electricity for general use (i.e., lights and appliances) and water heating, but not for space heating.

Rate 580/D580 - Residential, Home Heating

Applies to customers who heat the entire building solely with an electric heat system, with the exception of fireplaces and coal/wood burning stoves.

Rate 380/D380 - Residential, Water Heating

Applies to customers using water heated solely by electricity or in combination with a solar hot water system, in addition to basic household electricity use, and account must have been established prior to January 26, 1983 under this rate.

Rate 880/D880 - Residential, Water & Home Heating

Apply to customers using electricity for both water and space heating, which could include the use of a solar hot water system combined with an electric water heater, and service must have been established prior to January 26, 1983.

"Time-of-Use" Rates

Rate 188/D188 - Residential, Voluntary, Multiple Periods

An optional "off-peak pricing" rate for most electric customers whose usage is:

- less than 39,000 kilowatt hours (kWh) annually or
- 12,600 kWh for the months of June through September

Term: *Customers may switch to another service classification for which they qualify on their annual anniversary date, provided they request the transfer in writing at least 30 days in advance.*

The rates below are available as an option to customers with higher usage, or expected usage of:

- more than 39,000 kilowatt hours (kWh) annually or
- 12,600 kWh for the months of June through September

Rate 181 - Residential, Voluntary, Multiple Periods

(Without space heating)

This rate is available only to qualifying customers who are considered non-space heating.

Rate 182 - Residential, Voluntary, Multiple Periods

(Space Heating)

This rate is available only to qualifying customers who are considered space heating. The electric resistance heater or heat pump supplies all the heating requirement of the building and is permanently connected. (Fireplaces and coal/wood burning stoves are excluded.)

Rate 184 - Residential, Voluntary, Multiple Periods

(With or without space heating)

Term: *Customers may switch to another service classification for which they qualify on their annual anniversary date, provided they request the transfer in writing at least 30 days in advance.*

Energy Storage Rates

Rate 480/481 - Residential, Off Peak Storage

Available to Rate 180 customers who use electricity to store energy during the off-peak hours of:

- Midnight to 7:00 a.m. (Rate 480)
- 10:00 p.m. to 10:00 a.m. (Rate 481)

Customers are required to have separately metered, segregated circuits for this rate and cannot use the separately metered electricity for any other purpose except for energy storage and also at no other time except as specified above.

Residential Electric Rate Pricing

Effective January 1, 2018

Please review this entire guide to determine which rate is best suited for you. The rate you are currently billed under is listed on your bill. You may have made significant changes in the way you use electricity at your home and may find another rate more appropriate. All Service and Meter Charges are the per day cost.

Important Note

Please note that the charges shown in this guide are Delivery & System Charges, per meter. Your bill also includes a Power Supply Charge at a cost per kWh basis and various adjustments. For a further explanation, see "Additional Information" and "Other Charges."

Additional Information

Household Assistance Rate

(identified by a “D” in front of the rate code) –

Reduced rate for customers participating in at least one of the following programs in the last 12 months: HEAP, Medicaid, SNAP, Family Assistance (FA) or Safety Net Assistance (SNA), SSI, Veteran’s Pension or Veteran’s Surviving Spouse Pension. If you would like further information, please call 1-800-490-0025 or visit our web site at www.psegliny.com

The PSEG Long Island Green Choice Program is a voluntary program, in which PSEG Long Island customers may elect to purchase environmental attributes created by renewable energy to further encourage the development of this resource. A customer participating in the program can select an eligible Green Marketer and provide the Green Marketer with the necessary enrollment information. The Green Marketer may offer customers a number of renewable energy service options, including energy from wind, hydropower and bioenergy resources. The Green Marketer charges for the attributes will be in addition to your PSEG Long Island charges and included on your PSEG Long Island bill. To learn more, visit us at www.psegliny.com.

Proration of Bills – When the charge under a rate code is for a monthly (30-day) billing period, and a bill covers a period of either more or less than 30 days, this charge will be prorated. Prorating is done by adjusting the charge by a ratio of the number of days shown on your bill to 30 days. Charges are also prorated if usage crosses seasonal rates.

Other Charges

Distributed Energy Resources (DER) Charge – the cost of customer programs such as energy efficiency and conservation, as well as new technologies and methods for producing and storing energy.

NY State Assessment – Recovers costs imposed on utilities as per Public Service Law, Article 1 section 18-a(2) and 18-a(6). Payable to the State of New York.

Revenue Based PILOTS & Sales Tax – Payments In Lieu Of Taxes, or PILOTS, are state and local taxes on utility revenues. This does not include property taxes assessed on the electric system, which make up 15% of your bill. Sales tax, if applicable, is shown separately on each bill.

Suffolk Property Tax Adjustment – The amount collected from Suffolk County customers representing the overpayment of property taxes to the Shoreham taxing jurisdictions from a court-ordered legal settlement dated January 11, 2000.

Revenue Decoupling Adjustment – This billing adjustment is used by utilities to separate, or decouple, revenue from energy sales and encourage programs that help customers use less energy. It balances the actual revenue collected from delivery rates with the authorized revenue target. The adjustment is a credit when excess revenue is refunded to customers or a charge to avoid a shortfall in the revenue required to run and maintain the electric system.

Delivery Service Adjustment (*Effective 1/1/17*) – This billing adjustment creates a better way to account for unpredictable costs, including storm repairs, that are part of providing you with electric service. If actual costs are lower than budgeted costs, it is a credit returned to you. If actual costs are higher than budgeted costs, it is a charge. The goal is long-term electric rate stability.

Late Payment Charge – A late payment charge at the rate of one and one-half percent (1.5%) per monthly billing period will be applied if payment is not received by the “Pay by” date on the bill. Customers who make payments on time under the terms of a deferred payment agreement are not subject to late payment charges. Bills paid by the Department of Social Services or another governmental entity are not subject to late payment charges.

Reconnection Charges – When PSEG Long Island reconnects a customer’s electric service that has been terminated for non-payment of bills, a reconnection charge of eighty dollars (\$80.00) is applied. A reconnection charge of eighty dollars (\$80.00) will also be billed when a customer requests termination of service and then reapplies for service at the same premises within a 12-month period.

PSEG Long Island LLC and its operating subsidiary have been appointed as agent by the Long Island Power Authority to provide the day-to-day management and operations services of its electric utility system.
