

Pool Crossover Questionnaire

Name: _____
Address: _____
Email: _____
Phone: _____

Please complete and return the questionnaire below so we may schedule a site visit to measure your proposed or existing Pool Clearances and ensure compliance with the National Electric Safety Code (NESC).

Circle one of the following:

Is the Pool: Proposed / Existing
Above / In-ground / Semi-Buried

Depth or height of pool in inches:
(48" 4 ft.) (52" 4'4") _____

If below or semi-buried, how much
of the pool will be above ground?
(ex - 1' 18" 2' 30" 3') _____

Are there overhead wires in the backyard? Yes / No

Is the pool clearly staked or marked out as required? Yes / No

Is there a dog in the backyard? Yes / No

Is there access to the pool location? Yes / No

For your safety, a PSEG Long Island representative will measure the pool clearance to ensure it complies with the NESC. PSEG Long Island will measure from the edge of the water or the top edge of the pool when installed, to the Primary, Secondary and Service Drop to the house.

PSEG Long Island may measure several times if necessary to assist in the installation of the pool, when the last measurement is taken and the installed pool meets or exceeds the NESC requirements, a letter will be provided to the customer to provide to the town.
