Full Environmental Assessment Form Part 1 - Project and Setting

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1 is accurate and complete.

A. Project and Applicant/Sponsor Information.

Name of Action or Project:			
Bridgehampton to Buell (BTB) New 69kV Underground Transmission Cable			
Project Location (describe, and attach a general location map):			
LIPA owned or controlled ROW in the Town of Southampton and Town of East Hampton			
Brief Description of Proposed Action (include purpose or need):			
Please see supplemental attachment			
	T 1 1		
Name of Applicant/Sponsor: PSEG Long Island as Agent for the Long Island Lighting Company d/b/a LIPA, a wholly	Telephone: (800)490-0025		
owned subsidiary of the Long Island Power Authority	E-Mail: PSEG-LI-B2BSEQR@pseg.com		
Address: 175 East Old Country Road			
City/PO: Hicksville	State: NY	Zip Code: 11801	
Project Contact (if not same as sponsor; give name and title/role):	Telephone:		
	E-Mail:		
Address:			
City/PO:	State:	Zip Code:	
Property Owner (if not same as sponsor):	Telephone:		
Please see supplemental information	E-Mail:		
Address:			
City/PO:	State:	Zip Code:	

B. Government Approvals

B. Government Approvals, Funding, or Sponsorship.	("Funding"	" includes grants,	, loans, ta	ax relief, and a	any other f	orms o	f financial
assistance.)							

,	Т	T
Government Entity	If Yes: Identify Agency and Approval(s) Required	Application Date
	Kequireu	(Actual or projected)
a. City Counsel, Town Board, ☐Yes☐No or Village Board of Trustees	Property Easements from the Village of Sag Harbor, Town of Easthampton, Town of Southampton	TBD
b. City, Town or Village ☐Yes ☑No Planning Board or Commission		
c. City, Town or ☐Yes ZNo Village Zoning Board of Appeals		
d. Other local agencies □Yes☑No		
e. County agencies	Suffolk County Easements	TBD
f. Regional agencies Z Yes No	LIRR Crossing and Longitudinal Permit	TBD
g. State agencies	NYSDOS Coastal Consistency Review, NYSDEC Incidental Take Permit, LIPA approval of Transmission Construction Plan, NYSDEC SWPPP GP#0-20-001, NYS Parkland Alienation Legislation	TBD
h. Federal agencies ZYes No	USACE NWP #12	TBD
i. Coastal Resources.		
<i>i</i> . Is the project site within a Coastal Area, o	or the waterfront area of a Designated Inland W	Vaterway?
<i>ii</i> . Is the project site located in a community <i>iii</i> . Is the project site within a Coastal Erosior	with an approved Local Waterfront Revitalizate Hazard Area?	tion Program? ☑ Yes□No □ Yes☑No

	is the project site focuted in a community	, while an approved boear watermont
iii.	Is the project site within a Coastal Erosio	n Hazard Area?

C. Planning and Zoning

C.1. Planning and zoning actions.	
 Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation be the only approval(s) which must be granted to enable the proposed action to proceed? If Yes, complete sections C, F and G. If No, proceed to question C.2 and complete all remaining sections and questions in Part 1 	□Yes Z No
C.2. Adopted land use plans.	
a. Do any municipally- adopted (city, town, village or county) comprehensive land use plan(s) include the site where the proposed action would be located?	∠ Yes □ No
If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located?	☑Yes□No
 b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway; Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other?) If Yes, identify the plan(s): 	⊠ Yes⊡No
Coastal Resources & Water Protection Plan	
 c. Is the proposed action located wholly or partially within an area listed in an adopted municipal open space plan, or an adopted municipal farmland protection plan? If Yes, identify the plan(s): 	∐Yes Z No

C.3. Zoning	
a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance. If Yes, what is the zoning classification(s) including any applicable overlay district?	∠ Yes No
Aquifer Protection Overlay District, CR120, CR200, PC, A, A3, A5,B, C1, WRO Water Recharge Overlay	
NOTE: LIPA is a State Authority exempt from local zoning regulations	
b. Is the use permitted or allowed by a special or conditional use permit?	∠ Yes No
c. Is a zoning change requested as part of the proposed action?	☐ Yes Z No
If Yes, <i>i</i> . What is the proposed new zoning for the site?	
C.4. Existing community services.	
a. In what school district is the project site located? Bridgehampton UFSD, Sag Harbor UFSD, Wainscott Common SE), East Hampton UFSD
b. What police or other public protection forces serve the project site?	
Southampton Town Police, East Hampton Town Police	
c. Which fire protection and emergency medical services serve the project site?	
Sag Harbor Fire District, East Hampton Fire District, Sag Harbor Volunteer Ambulance Corps Inc., East Hampton Willage A	Ambulance Association
d. What parks serve the project site?	
Long Pond Greenbelt, Millers Ground Preserve, Buckskill Preserve,	
	·····
D. Project Details	
D.1. Proposed and Potential Development	
a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational; if n	nixed, include all
components)? Public electric utility	
b. a. Total acreage of the site of the proposed action? b. Total acreage to be physically disturbed? 18.7 acres	
c. Total acreage (project site and any contiguous properties) owned	ed or controlled
or controlled by the applicant or project sponsor? <u>±84</u> acres the Propos	ROW extends west of
c. Is the proposed action an expansion of an existing project or use?	Ves No
<i>i.</i> If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, r	
square feet)? % 100 Units: 5.2 miles within the existing overhead RC	W
d. Is the proposed action a subdivision, or does it include a subdivision?	□Yes ∠ No
If Yes,	
<i>i</i> . Purpose or type of subdivision? (e.g., residential, industrial, commercial; if mixed, specify types)	
<i>ii.</i> Is a cluster/conservation layout proposed?	□Yes □No
<i>iii</i> . Number of lots proposed?	
<i>iv.</i> Minimum and maximum proposed lot sizes? Minimum Maximum	
e. Will the proposed action be constructed in multiple phases?	☐ Yes Z No
<i>i</i> . If No, anticipated period of construction: <u>12</u> months <i>ii</i> . If Yes:	
 Total number of phases anticipated 	
Anticipated commencement date of phase 1 (including demolition) month year	
Anticipated completion date of final phase month year	

• Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases:

f. Does the proje	ct include new resid	lential uses?			☐ Yes 7 No	
If Yes, show nur	nbers of units propo					
	One Family	<u>Two Family</u>	Three Family	Multiple Family (four or more)		
Initial Phase						
At completion						
of all phases						
a Deer the prop	and action include	now non residenti	al construction (inclu	iding avranciona)?	⊘ Yes No	
If Yes,	osed action menude	new non-residenti	ai constituction (men	iding expansions):	_	
	r of structures <u>20: 1</u> 4	4 manholes and 6 te	mination structures		Dimensions provided for a group of 3 termination	
ii. Dimensions	(in feet) of largest pr	roposed structure:	17' height;	<u>6'</u> width; and <u>16'</u> length	structures to be installed	
iii. Approximate	e extent of building s	space to be heated	or cooled:	<u> </u>	adjacent to one another within each substation	
h. Does the prop	osed action include	construction or oth	ner activities that wil	l result in the impoundment of any	Yes VNo	
				agoon or other storage?		
If Yes,				0		
<i>i</i> . Purpose of th	e impoundment:					
<i>ii</i> . If a water imp	poundment, the prin	cipal source of the	water:	Ground water Surface water s	treams Other specify:	
<i>iii</i> . If other than	water, identify the ty	ype of impounded/	contained liquids and	d their source.

	be replaced to the ma	<u>xiniuni extent plactic</u>	able and vegetative res	ioration will occur in any areas where we	egetation previously existed.	
b. Would the pro-	posed action cause	or result in alterati	on of, increase or de	crease in size of, or encroachment	V Yes No	
			ach or adjacent area?			
If Yes:	-		·			
				vater index number, wetland map n		
description):	The HDD laydown are	a crosses over a wet	land associated with the	e NYSDEC ID# SA-27 wetland complex.		

<i>ii.</i> Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placer alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in such as the second	quare feet or acres:
A temporary encroachment would occur during construction to facilitate the proposed HDD laydown are nstalled prior to construction. No vehicles will enter the wetland; existing access paths to the east and west of	
access necessary for laydown activities.	
<i>iii.</i> Will the proposed action cause or result in disturbance to bottom sediments? If Yes, describe:	∐ Yes ⊠ No
<i>iv.</i> Will the proposed action cause or result in the destruction or removal of aquatic vegetation? If Yes:	☐ Yes Z No
acres of aquatic vegetation proposed to be removed:	
expected acreage of aquatic vegetation remaining after project completion:	
• purpose of proposed removal (e.g. beach clearing, invasive species control, boat access):	
 proposed method of plant removal:	
 If chemical/herbicide treatment will be used, specify product(s): v. Describe any proposed reclamation/mitigation following disturbance: 	
Timber matting will be utilized during construction and any vegetated areas disturbed will be re-vegetated with appropriate	native vegetation
c. Will the proposed action use, or create a new demand for water? Water usage only required	Z Yes N o
If Yes: during HDD construction	
<i>i.</i> Total anticipated water usage/demand per day: 15,000 gallons/day	
<i>ii.</i> Will the proposed action obtain water from an existing public water supply? If Yes:	✓ Yes □ No
Name of district or service area: Suffolk County Water Authority	
• Does the existing public water supply have capacity to serve the proposal?	Yes No
• Is the project site in the existing district?	✓ Yes 🗖 No
• Is expansion of the district needed?	🗌 Yes 🔽 No
• Do existing lines serve the project site?	🗌 Yes 🔽 No
<i>iii.</i> Will line extension within an existing district be necessary to supply the project? If Yes:	Yes V No
Describe extensions or capacity expansions proposed to serve this project:	
Source(s) of supply for the district:	
<i>iv.</i> Is a new water supply district or service area proposed to be formed to serve the project site? If, Yes:	☐ Yes ⊠ No
Applicant/sponsor for new district:	
Date application submitted or anticipated:	
Proposed source(s) of supply for new district:	
<i>v</i> . If a public water supply will not be used, describe plans to provide water supply for the project:	
	A gallons/minute.
d. Will the proposed action generate liquid wastes?	✓ Yes □No
<i>i</i> . Total anticipated liquid waste generation per day:	y be generated from HDD
<i>ii.</i> Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe approximate volumes or proportions of each):	all components and
Drilling fluids (slurry) will be generated during HDD activities and will be re-used much as possible on-site, or at another condition. Any excess fluid that cannot be re-used will be transported and disposed of at an approved disposal facility license	onstruction site not related to the
<i>iii.</i> Will the proposed action use any existing public wastewater treatment facilities? If Yes:	∏Yes ∑ No
 Name of wastewater treatment plant to be used:	
Name of wastewater treatment plant to be used.	
 Name of district: Does the existing wastewater treatment plant have capacity to serve the project? 	☐ Yes ☐No
 Is the project site in the existing district? 	\Box Yes \Box No
 Is expansion of the district needed? 	\Box Yes \Box No
•	

• Do existing sewer lines serve the project site?	□ Yes □	
• Will a line extension within an existing district be necessary to serve the project?	□Yes □	No
If Yes:		
Describe extensions or capacity expansions proposed to serve this project:		
<i>iv.</i> Will a new wastewater (sewage) treatment district be formed to serve the project site?	□Yes Z	No
If Yes:		
Applicant/sponsor for new district:		
Date application submitted or anticipated:		·
What is the receiving water for the wastewater discharge?		
v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including speci	ifying prop	osed
receiving water (name and classification if surface discharge or describe subsurface disposal plans):	L.	
Sanitary wastewater during construction will be collected from on-site portable sanitary facilities and disposed of at an approved facilities	IY	
vi. Describe any plans or designs to capture, recycle or reuse liquid waste:		
Drilling fluids (slurry) generated during HDD activities will be re-used much as possible on-site or at another construction site. The mix	is reclaime	d with a
pump truck into a tanker truck on-Site to be recycled and re-used on this Proposed Action to the maximum extent practicable.		
e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point	⊘ Yes □	No
sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point		INU
source (i.e. sheet flow) during construction or post construction?		
If Yes:		
<i>i</i> . How much impervious surface will the project create in relation to total size of project parcel?		
<u>154</u> Square feet or <u>.003</u> acres (impervious surface)		
1,585,584 Square feet or <u>36.4</u> acres (parcel size)		
<i>ii.</i> Describe types of new point sources. 14 underground manholes will be installed underground with the exception of the man negligible point ources	hole covers	which are
<i>iii.</i> Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent pr	conartias	
groundwater, on-site surface water or off-site surface waters)?	opernes,	
All stormwater will be retained onsite.		
If to surface waters, identify receiving water bodies or wetlands:		
		NT
• Will stormwater runoff flow to adjacent properties? <i>iv.</i> Does the proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater?	\Box Yes \Box	
f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel	✓ Yes	
combustion, waste incineration, or other processes or operations?		INO
If Yes, identify:		
<i>i</i> . Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)		
No, mobile sources during project operations will not result from the Proposed Action.		
ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)		
No stationary sources required during construction		
<i>iii.</i> Stationary sources during operations (e.g., process emissions, large boilers, electric generation)		
Project operations will not result in mobile air emission sources associated with the Proposed Action		
g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit,	∐Yes Z ∃	No
or Federal Clean Air Act Title IV or Title V Permit?		
If Yes: <i>i</i> . Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet	□Yes□	No
ambient air quality standards for all or some parts of the year)		INU
<i>ii.</i> In addition to emissions as calculated in the application, the project will generate:		
Tons/year (short tons) of Carbon Dioxide (CO ₂)		
• Tons/year (short tons) of Nitrous Oxide (N ₂ O)		
Tons/year (short tons) of Perfluorocarbons (PFCs)		
• Tons/year (short tons) of Sulfur Hexafluoride (SF ₆)		
Tons/year (short tons) of Carbon Dioxide equivalent of Hydroflourocarbons (HFCs)		
Tons/year (short tons) of Hazardous Air Pollutants (HAPs)		

 h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)? If Yes: 	∐Yes ∏ No
 <i>i.</i> Estimate methane generation in tons/year (metric):	generate heat or
 i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations? If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust): 	☐Yes ⁄ No
 j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services? If Yes: <i>i</i>. When is the peak traffic expected (Check all that apply): Morning Evening Weekend Randomly between hours of to <i>ii</i>. For commercial activities only, projected number of truck trips/day and type (e.g., semi trailers and dump truck trips/day and type (e.g., semi trailers). 	∐Yes ∏ No
 <i>iii.</i> Parking spaces: Existing Proposed Net increase/decrease <i>iv.</i> Does the proposed action include any shared use parking? <i>v.</i> If the proposed action includes any modification of existing roads, creation of new roads or change in existing <i>vi.</i> Are public/private transportation service(s) or facilities available within ½ mile of the proposed site? <i>vii</i> Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles? <i>viii.</i> Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes? 	□Yes□No
 k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand for energy? If Yes: <i>i</i>. Estimate annual electricity demand during operation of the proposed action: <i>ii</i>. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid other): 	
iii. Will the proposed action require a new, or an upgrade, to an existing substation? i. Hours of operation. Answer all items which apply. i. During Construction: ii. During Operations: • Monday - Friday: 7am-7pm • Saturday: 7am-7pm • Sunday: 7am-7pm • Holidays: 7am-7pm • Holidays: 7am-7pm	however, no continuous ence will be required.

m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction,	☑ Yes □No
operation, or both? If yes:	
<i>i</i> . Provide details including sources, time of day and duration:	
Ambient noise levels will be exceeded during construction activities only. Noise will result from the operation of heavy machinery requ	uired for HDD,
trenching, jack-and-bore and vault installations. The operation of the proposed action will have no significant effect on ambient noise	levels.
<i>ii.</i> Will the proposed action remove existing natural barriers that could act as a noise barrier or screen?	□ Yes 2 No
Describe:	
n. Will the proposed action have outdoor lighting?	✓ Yes □No
If yes:	
<i>i</i> . Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:	
Temporary lighting will be utilized during construction. No permanent lighting will be installed under the Proposed Action.	
<i>ii.</i> Will proposed action remove existing natural barriers that could act as a light barrier or screen?	☐ Yes Z No
Describe:	
o. Does the proposed action have the potential to produce odors for more than one hour per day?	Yes V No
If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest	
occupied structures:	
p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons)	🗌 Yes 🛛 No
or chemical products 185 gallons in above ground storage or any amount in underground storage?	
If Yes: <i>i</i> . Product(s) to be stored	
<i>ii.</i> Volume(s) per unit time (e.g., month, year)	
<i>iii.</i> Generally, describe the proposed storage facilities:	
q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides,	🗌 Yes 🔽 No
insecticides) during construction or operation?	
If Yes: <i>i</i> . Describe proposed treatment(s):	
i. Describe proposed ireautient(s).	
<i>ii.</i> Will the proposed action use Integrated Pest Management Practices?	☐ Yes ☐No
r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal	
of solid waste (excluding hazardous materials)?	
If Yes:	
<i>i</i> . Describe any solid waste(s) to be generated during construction or operation of the facility:	
 Construction: tons per (unit of time) Operation : tons per (unit of time) 	
<i>ii.</i> Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waster	
Construction:	
Operation:	
<i>iii.</i> Proposed disposal methods/facilities for solid waste generated on-site:	
Construction:	
• Operation:	

s. Does the proposed action include construction or modification of a solid waste management facility? 🛛 🗌 Yes 🖉 No					
If Yes:			1 1011		
<i>i</i> . Type of management or handling of waste proposed other disposal activities):			g, landfill, or		
<i>ii.</i> Anticipated rate of disposal/processing:					
Tons/month, if transfer or other non-	combustion/thermal treatment	. or			
• Tons/hour, if combustion or thermal	treatment	,			
iii. If landfill, anticipated site life:	years				
t. Will the proposed action at the site involve the comme	rcial generation, treatment, sto	orage, or disposal of hazard	ous 🗌 Yes 🖌 No		
waste?					
If Yes:	. 1 1 11 1	1 . C . 11.			
<i>i</i> . Name(s) of all hazardous wastes or constituents to be	e generated, handled or manag	ed at facility:			
ii. Generally describe processes or activities involving l	nazardous wastes or constituer	nts:			
<i>iii.</i> Specify amount to be handled or generatedt t <i>iv.</i> Describe any proposals for on-site minimization, rec	weling or reuse of hazardous of	constituents.			
W. Deserve any proposale for on site minimization, fee	Jennig of Teube of huzurdous e		·····		
<i>v</i> . Will any hazardous wastes be disposed at an existing	g offsite hazardous waste facil	ity?	Yes No		
If Yes: provide name and location of facility:					
If No: describe proposed management of any hazardous	wastes which will not be sent	to a hazardous waste facili	v:		
in the aborted proposed management of any nazardedas mastes which will not be bent to a nazardedas waste facility.					
E Site and Setting of Duanaged Action					
E. Site and Setting of Proposed Action					
E.1. Land uses on and surrounding the project site					
a. Existing land uses.					
<i>i</i> . Check all uses that occur on, adjoining and near the	project site.				
Urban Industrial Z Commercial Z Resid					
	r (specify):				
<i>ii.</i> If mix of uses, generally describe:	owned or controlled ROW				
The Proposed Action is located largely within the existing LIPA

Describe:

c. Is the project site presently used by members of the community for public recreation?<i>i</i>. If Yes: explain: The ROW intersects the Long Pond Greenbelt, Millers Grove Preserve & Buckskill Preserve	✓ Yes No
 d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site? If Yes, 	☐ Yes Z No
<i>i</i> . Identify Facilities:	
e. Does the project site contain an existing dam?	☐ Yes <mark>7</mark> No
If Yes: <i>i</i> . Dimensions of the dam and impoundment:	
Dam height: feet	
Dam length: feet	
Surface area: acres	
Volume impounded: gallons OR acre-feet	
<i>ii.</i> Dam's existing hazard classification:	
iii. Provide date and summarize results of last inspection:	
f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility, or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility for the factor of the project site adjoin property which is now, or was at one time, used as a solid waste management facility for the project site adjoin property which is now, or was at one time, used as a solid waste management facility.	∐Yes ∑ No lity?
<i>i</i> . Has the facility been formally closed?	□Yes□ No
If yes, cite sources/documentation:	
<i>ii</i> . Describe the location of the project site relative to the boundaries of the solid waste management facility:	
<i>iii</i> . Describe any development constraints due to the prior solid waste activities:	
g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste? If Yes:	☐ Yes Z No
<i>i</i> . Describe waste(s) handled and waste management activities, including approximate time when activities occurr	ed:
 h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site? If Yes: 	✔Yes No
<i>i</i> . Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site Remediation database? Check all that apply:	☐ Yes Z No
Yes – Spills Incidents database Provide DEC ID number(s):	
 Yes – Environmental Site Remediation database Provide DEC ID number(s): 	
<i>ii</i> . If site has been subject of RCRA corrective activities, describe control measures:	
<i>iii.</i> Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database? If yes, provide DEC ID number(s): 152250	✓ Yes □ No
<i>iv.</i> If yes to (i), (ii) or (iii) above, describe current status of site(s):	
The East Hampton/Gabreski Airport is a State Superfund site and located to the south of the Proposed Action. Remediation e	fforts are ongoing.

v. Is the project site subject to an institutional control		☐ Yes Z No
• If yes, DEC site ID number:	1 1	
 Describe the type of institutional control (e.g Describe any use limitations: 	., deed restriction or easement):	
 Describe any use miniations. Describe any engineering controls: 		
 Will the project affect the institutional or eng Explain:	ineering controls in place?	Yes No
E.2. Natural Resources On or Near Project Site		
a. What is the average depth to bedrock on the project	site? <u>±1000</u> feet	
b. Are there bedrock outcroppings on the project site? If Yes, what proportion of the site is comprised of bedr	rock outcroppings?%	☐ Yes ⁄ No
c. Predominant soil type(s) present on project site:	Carver & Plymouth Sands 63 9	
	Plymouth loamy sand 17 9	
	Riverhead Sandy Loam 10 9	0
d. What is the average depth to the water table on the p	project site? Average: <u>0 to +200</u> feet	
e. Drainage status of project site soils: 🗹 Well Drained		
Moderately V		
Poorly Drain		
f. Approximate proportion of proposed action site with		
	$\boxed{\cancel{10-15\%}}$ 10-15%: <u>41</u> % of site $\boxed{\cancel{15\%}}$ or greater: <u>14</u> % of site	
g. Are there any unique geologic features on the project If Yes, describe:		☐ Yes ⁄ No
h. Surface water features.		
<i>i.</i> Does any portion of the project site contain wetland ponds or lakes)?	ls or other waterbodies (including streams, rivers,	√ Yes No
<i>ii</i> . Do any wetlands or other waterbodies adjoin the pr	oject site?	√ Yes No
If Yes to either <i>i</i> or <i>ii</i> , continue. If No, skip to E.2.i.		
<i>iii.</i> Are any of the wetlands or waterbodies within or a state or local agency?	djoining the project site regulated by any federal,	✓ Yes □ No
 <i>iv.</i> For each identified regulated wetland and waterboo Streams: Name 924-107 	ly on the project site, provide the following information: Classification C	
• Lakes or Ponds: Name Lond Pond	Classification 1	
Wetlands: Name Long Pond, NYS Wetla Wetland No. (if regulated by DEC) SA-3. SA-	Inds and federal waters Classification 1 Approximate Size 46.2	2 ac, 127.5 ac, 37.4ac
 Wetland No. (if regulated by DEC) <u>SA-3, SA-</u> v. Are any of the above water bodies listed in the most waterbodies? 		Yes No
	for listing as impaired:	
i. Is the project site in a designated Floodway?		∐Yes ∑ No
j. Is the project site in the 100-year Floodplain?		√ Yes N o
k. Is the project site in the 500-year Floodplain?		∐Yes ∑ No
l. Is the project site located over, or immediately adjoin	ning, a primary, principal or sole source aquifer?	✓ Yes □ No
If Yes: <i>i</i> . Name of aquifer: Sole Source Aquifer Names:Nassau-S	Suffolk SSA	

m. Identify the predominant wildlife species White tailed deer	10 10	Grey Squirrel	
Red tailed hawk	Raccoon American robin	Virginia opposum	
	American robin		
 n. Does the project site contain a designated If Yes: <i>i</i>. Describe the habitat/community (compo Coastal Plain Pond Shore, Coastal Oak-Heath 	sition, function, and basis for designat	ion):	Yes No
<i>ii.</i> Source(s) of description or evaluation:			
<i>iii.</i> Extent of community/habitat:			
• Currently:	3,078.5		
 Following completion of project as 	1 1	acres Coastal Oak-Heath Fore	· · · · · · · · · · · · · · · · · · ·

p. Does the project site contain any species special concern?	of plant or animal that is listed by NY	S as rare, or as a species of	√ Yes □ No
*			
If Yes: <i>i</i> . Species and listing:			
Long-beaked Beak Sedge, Coastal Barrens Buckm	oth Southern Sprite		
q. Is the project site or adjoining area curren		or shell fishing?	✓ Yes No
If yes, give a brief description of how the pr		Long Dand will be to me analy limited	dunin n. e etine
Access to the Long Pond Greenbelt kayak laun construction within the ROW.	ch, potentially utilized for fishing access to	Long Pond, will be temporarily limited	during active
E.3. Designated Public Resources On or I	Near Project Site		
 a. Is the project site, or any portion of it, loc. Agriculture and Markets Law, Article 25 If Yes, provide county plus district name/nu 	-AA, Section 303 and 304?	ct certified pursuant to	∐Yes ∏ No
b. Are agricultural lands consisting of highly	productive soils present?		∐ Yes ∑ No
<i>ii</i> . Source(s) of soil rating(s):			
 c. Does the project site contain all or part of Natural Landmark? If Yes: 	c, or is it substantially contiguous to, a	registered National	∐Yes ∏ No
		eological Feature	
ii. Provide brief description of landmark, i	ncluding values behind designation an	d approximate size/extent:	
d. Is the project site located in or does it adjo	oin a state listed Critical Environmenta	al Area?	√ Yes No
If Yes: <i>i</i> . CEA name: Aquifer Overlay District, Long R	Pond SGPA Water Recharge		
<i>ii.</i> Basis for designation: Preserve pure water qu		vater. Protect groundwater. Protect groundwater	ater & drinking water
iii. Designating agency and date: Agency: Sou			

e. Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on the National or State Register of Historic Places, or that has been determined by the Commission Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places.	
<i>i</i> . Nature of historic/archaeological resource: Archaeological Site Historic Building or District <i>ii</i> . Name:	
<i>iii.</i> Brief description of attributes on which listing is based:	
f. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory?	⊘ Yes No
 g. Have additional archaeological or historic site(s) or resources been identified on the project site? If Yes: <i>i</i>. Describe possible resource(s): <i>ii</i>. Basis for identification: 	☐Yes ØNo
 h. Is the project site within fives miles of any officially designated and publicly accessible federal, state, or local scenic or aesthetic resource? If Yes: <i>i</i>. Identify resource: <i>ii</i>. Nature of, or basis for, designation (e.g., established highway overlook, state or local park, state historic trail or 	Yes No
etc.):	
 i. Is the project site located within a designated river corridor under the Wild, Scenic and Recreational Rivers Program 6 NYCRR 666? If Yes: i. Identify the name of the river and its designation: 	Yes No
ii. Is the activity consistent with development restrictions contained in 6NYCRR Part 666?	∐Yes∐No

F. Additional Information

Attach any additional information which may be needed to clarify your project.

If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

G. Verification

I certify that the information provided is true to the best of my knowledge.

Disclaimer: The EAF Mapper is a screening tool intended to assist project sponsors and reviewing agencies in preparing an environmental assessment form (EAF). Not all questions asked in the EAF are answered by the EAF Mapper. Additional information on any EAF question can be obtained by consulting the EAF Workbooks. Although the EAF Mapper provides the most up-to-date digital data available to DEC, you may also need to contact local or other data sources in order to obtain data not provided by the Mapper. Digital data is not a substitute for agency determinations.

E.3.f. [Archeological Sites]	Yes
E.3.i. [Designated River Corridor]	No

Full Environmental Assessment Form Project : Part 2 - Identification of Potential Project Impacts Date :

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2. •
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section. .
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact. •
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis. •
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts. •
- Answer the question in a reasonable manner considering the scale and context of the project.

 Impact on Land Proposed action may involve construction on, or physical alteration of, the land surface of the proposed site. (See Part 1. D.1) If "Yes", answer questions a - j. If "No", move on to Section 2. 	□NO		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may involve construction on land where depth to water table is less than 3 feet.	E2d		
b. The proposed action may involve construction on slopes of 15% or greater.	E2f		
c. The proposed action may involve construction on land where bedrock is exposed, or generally within 5 feet of existing ground surface.	E2a		
d. The proposed action may involve the excavation and removal of more than 1,000 tons of natural material.	D2a		
e. The proposed action may involve construction that continues for more than one year or in multiple phases.	D1e		
f. The proposed action may result in increased erosion, whether from physical disturbance or vegetation removal (including from treatment by herbicides).	D2e, D2q		
g. The proposed action is, or may be, located within a Coastal Erosion hazard area.	Bli		
h. Other impacts:			

 Impact on Geological Features The proposed action may result in the modification or destruction of, or inhib access to, any unique or unusual land forms on the site (e.g., cliffs, dunes, minerals, fossils, caves). (See Part 1. E.2.g) If "Yes", answer questions a - c. If "No", move on to Section 3. 	it 🗸 NC		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. Identify the specific land form(s) attached:	E2g		
b. The proposed action may affect or is adjacent to a geological feature listed as a registered National Natural Landmark. Specific feature:	E3c		
c. Other impacts:			
	·		
3. Impacts on Surface Water The proposed action may affect one or more wetlands or other surface water bodies (e.g., streams, rivers, ponds or lakes). (See Part 1. D.2, E.2.h) <i>If "Yes", answer questions a - l. If "No", move on to Section 4.</i>			YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may create a new water body.	D2b, D1h		
b. The proposed action may result in an increase or decrease of over 10% or more than a 10 acre increase or decrease in the surface area of any body of water.	D2b		
c. The proposed action may involve dredging more than 100 cubic yards of material from a wetland or water body.	D2a		
d. The proposed action may involve construction within or adjoining a freshwater or tidal wetland, or in the bed or banks of any other water body.	E2h		
e. The proposed action may create turbidity in a waterbody, either from upland erosion, runoff or by disturbing bottom sediments.	D2a, D2h		
f. The proposed action may include construction of one or more intake(s) for withdrawal of water from surface water.	D2c		
g. The proposed action may include construction of one or more outfall(s) for discharge of wastewater to surface water(s).	D2d		
h. The proposed action may cause soil erosion, or otherwise create a source of stormwater discharge that may lead to siltation or other degradation of receiving water bodies.	D2e	Ø	
i. The proposed action may affect the water quality of any water bodies within or downstream of the site of the proposed action.	E2h		
j. The proposed action may involve the application of pesticides or herbicides in or around any water body.	D2q, E2h		
k. The proposed action may require the construction of new, or expansion of existing, wastewater treatment facilities.	D1a, D2d		

 The proposed action may result in new or additional use of ground water, or may have the potential to introduce contaminants to ground water or an aquife (See Part 1. D.2.a, D.2.c, D.2.d, D.2.p, D.2.q, D.2.t) If "Yes", answer questions a - h. If "No", move on to Section 5. 	□NC er.		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may require new water supply wells, or create additional demand on supplies from existing water supply wells.	D2c		
b. Water supply demand from the proposed action may exceed safe and sustainable withdrawal capacity rate of the local supply or aquifer. Cite Source:	D2c		
c. The proposed action may allow or result in residential uses in areas without water and sewer services.	D1a, D2c		
d. The proposed action may include or require wastewater discharged to groundwater.	D2d, E2l	V	
e. The proposed action may result in the construction of water supply wells in locations where groundwater is, or is suspected to be, contaminated.	D2c, E1f, E1g, E1h		
f. The proposed action may require the bulk storage of petroleum or chemical products over ground water or an aquifer.	D2p, E2l		
g. The proposed action may involve the commercial application of pesticides within 100 feet of potable drinking water or irrigation sources.	E2h, D2q, E2l, D2c		
h. Other impacts:			

 5. Impact on Flooding The proposed action may result in development on lands subject to flooding. (See Part 1. E.2) If "Yes", answer questions a - g. If "No", move on to Section 6. 	NO		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may result in development in a designated floodway.	E2i	\checkmark	
b. The proposed action may result in development within a 100 year floodplain.	E2j		
c. The proposed action may result in development within a 500 year floodplain.	E2k		
d. The proposed action may result in, or require, modification of existing drainage patterns.	D2b, D2e		
e. The proposed action may change flood water flows that contribute to flooding.	D2b, E2i, E2j, E2k		
f. If there is a dam located on the site of the proposed action, is the dam in need of repair, or upgrade?	E1e		

g. Other impacts:			
 6. Impacts on Air The proposed action may include a state regulated air emission source. (See Part 1. D.2.f., D.2.h, D.2.g) If "Yes", answer questions a - f. If "No", move on to Section 7. 	V NC	, []	YES
If Tes, unswer questions a - J. If No, move on to section 7.	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
 a. If the proposed action requires federal or state air emission permits, the action may also emit one or more greenhouse gases at or above the following levels: More than 1000 tons/year of carbon dioxide (CO₂) More than 3.5 tons/year of nitrous oxide (N₂O) More than 1000 tons/year of carbon equivalent of perfluorocarbons (PFCs) More than 1000 tons/year of sulfur hexafluoride (SF₆) More than 1000 tons/year of carbon dioxide equivalent of hydrochloroflourocarbons (HFCs) emissions vi. 43 tons/year or more of methane 	D2g D2g D2g D2g D2g D2g D2h		
b. The proposed action may generate 10 tons/year or more of any one designated hazardous air pollutant, or 25 tons/year or more of any combination of such hazardous air pollutants.	D2g		
c. The proposed action may require a state air registration, or may produce an emissions rate of total contaminants that may exceed 5 lbs. per hour, or may include a heat source capable of producing more than 10 million BTU's per hour.	D2f, D2g		
d. The proposed action may reach 50% of any of the thresholds in "a" through "c", above.	D2g		
e. The proposed action may result in the combustion or thermal treatment of more than 1 ton of refuse per hour.	D2s		
f. Other impacts:			
 7. Impact on Plants and Animals The proposed action may result in a loss of flora or fauna. (See Part 1. E.2. 1 If "Yes", answer questions a - j. If "No", move on to Section 8. 	mq.)	NO	V YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may cause reduction in population or loss of individuals of any threatened or endangered species, as listed by New York State or the Federal government, that use the site, or are found on, over, or near the site.	E2o		
b. The proposed action may result in a reduction or degradation of any habitat used by any rare, threatened or endangered species, as listed by New York State or the federal government	E2o		

government.		
c. The proposed action may cause reduction in population, or loss of individuals, of any species of special concern or conservation need, as listed by New York State or the Federal government, that use the site, or are found on, over, or near the site.	E2p	
d. The proposed action may result in a reduction or degradation of any habitat used by any species of special concern and conservation need, as listed by New York State or the Federal government.	E2p	

e. The proposed action may diminish the capacity of a registered National Natural Landmark to support the biological community it was established to protect.	E3c		
f. The proposed action may result in the removal of, or ground disturbance in, any portion of a designated significant natural community. Source: <u>NYS Natural Heritage Program</u>	E2n		
g. The proposed action may substantially interfere with nesting/breeding, foraging, or over-wintering habitat for the predominant species that occupy or use the project site.	E2m		
h. The proposed action requires the conversion of more than 10 acres of forest, grassland or any other regionally or locally important habitat. Habitat type & information source:	E1b		
i. Proposed action (commercial, industrial or recreational projects, only) involves use of herbicides or pesticides.	D2q	Z	
j. Other impacts:			

8. Impact on Agricultural Resources The proposed action may impact agricultural resources. (See Part 1. E.3.a. and b.) If "Yes", answer questions a - h. If "No", move on to Section 9.			YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may impact soil classified within soil group 1 through 4 of the NYS Land Classification System.	E2c, E3b		
b. The proposed action may sever, cross or otherwise limit access to agricultural land (includes cropland, hayfields, pasture, vineyard, orchard, etc).	E1a, Elb		
c. The proposed action may result in the excavation or compaction of the soil profile of active agricultural land.	E3b		
d. The proposed action may irreversibly convert agricultural land to non-agricultural uses, either more than 2.5 acres if located in an Agricultural District, or more than 10 acres if not within an Agricultural District.	E1b, E3a		
e. The proposed action may disrupt or prevent installation of an agricultural land management system.	El a, E1b		
f. The proposed action may result, directly or indirectly, in increased development potential or pressure on farmland.	C2c, C3, D2c, D2d		
g. The proposed project is not consistent with the adopted municipal Farmland Protection Plan.	C2c		
h. Other impacts:			

9. Impact on Aesthetic Resources			
The land use of the proposed action are obviously different from, or are in sharp contrast to, current land use patterns between the proposed project and a scenic or aesthetic resource. (Part 1. E.1.a, E.1.b, E.3.h.) If "Yes", answer questions a - g. If "No", go to Section 10.	√ N0]YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. Proposed action may be visible from any officially designated federal, state, or local scenic or aesthetic resource.	E3h		
b. The proposed action may result in the obstruction, elimination or significant screening of one or more officially designated scenic views.	E3h, C2b		
c. The proposed action may be visible from publicly accessible vantage points:i. Seasonally (e.g., screened by summer foliage, but visible during other seasons)ii. Year round	E3h		
d. The situation or activity in which viewers are engaged while viewing the proposed	E3h		
action is:	E2q,		
i. Routine travel by residents, including travel to and from workii. Recreational or tourism based activities	E1c		
e. The proposed action may cause a diminishment of the public enjoyment and appreciation of the designated aesthetic resource.			
 f. There are similar projects visible within the following distance of the proposed project: 0-1/2 mile ½ -3 mile 3-5 mile 5+ mile 	Dla, Ela, Dlf, Dlg		
g. Other impacts:			
 10. Impact on Historic and Archeological Resources The proposed action may occur in or adjacent to a historic or archaeological resource. (Part 1. E.3.e, f. and g.) If "Yes", answer questions a - e. If "No", go to Section 11.		o 🗸]YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may occur wholly or partially within, or substantially contiguous to, any buildings, archaeological site or district which is listed on the National or State Register of Historical Places, or that has been determined by the Commissioner of the NYS Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places.	E3e		
b. The proposed action may occur wholly or partially within, or substantially contiguous to, an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory.	E3f		
c. The proposed action may occur wholly or partially within or substantially contiguous	F3g		

d. Other impacts:			
If any of the above (a-d) are answered "Moderate to large impact may e. occur", continue with the following questions to help support conclusions in Part 3:			
i. The proposed action may result in the destruction or alteration of all or part of the site or property.	E3e, E3g, E3f		
ii. The proposed action may result in the alteration of the property's setting or integrity.	E3e, E3f, E3g, E1a, E1b		
iii. The proposed action may result in the introduction of visual elements which are out of character with the site or property, or may alter its setting.			
 11. Impact on Open Space and Recreation The proposed action may result in a loss of recreational opportunities or a reduction of an open space resource as designated in any adopted municipal open space plan. (See Part 1. C.2.c, E.1.c., E.2.q.) If "Yes", answer questions a - e. If "No", go to Section 12.		o 🗸	YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may result in an impairment of natural functions, or "ecosystem services", provided by an undeveloped area, including but not limited to stormwater storage, nutrient cycling, wildlife habitat.	D2e, E1b E2h, E2m, E2o, E2n, E2p		
b. The proposed action may result in the loss of a current or future recreational resource.			
c. The proposed action may eliminate open space or recreational resource in an area with few such resources.	C2a, C2c E1c, E2q		
d. The proposed action may result in loss of an area now used informally by the community as an open space resource.	C2c, E1c		
e. Other impacts:			
12. Impact on Critical Environmental Areas The proposed action may be located within or adjacent to a critical environmental area (CEA). (See Part 1. E.3.d) <i>If "Yes", answer questions a - c. If "No", go to Section 13.</i>		0	YES
If Tes, unswer questions a - c. If No, go to section 15.	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may result in a reduction in the quantity of the resource or characteristic which was the basis for designation of the CEA.	E3d		
b. The proposed action may result in a reduction in the quality of the resource or characteristic which was the basis for designation of the CEA.	E3d		
c. Other impacts:			

13 Impact on Transportation					
13. Impact on Transportation The proposed action may result in a change to existing transportation systems. ✓NO YES (See Part 1. D.2.j)					
If "Yes", answer questions a - f. If "No", go to Section 14.					
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur		
a. Projected traffic increase may exceed capacity of existing road network.	D2j				
b. The proposed action may result in the construction of paved parking area for 500 or more vehicles.	D2j				
c. The proposed action will degrade existing transit access.	D2j				
d. The proposed action will degrade existing pedestrian or bicycle accommodations.	D2j				
e. The proposed action may alter the present pattern of movement of people or goods.	D2j				
f. Other impacts:					
14. Impact on Energy					
14. Impact on Energy The proposed action may cause an increase in the use of any form of energy. (See Part 1. D.2.k) If "Yes", answer questions a - e. If "No", go to Section 15.					
	Relevant Part I	No, or small	Moderate to large		
	Question(s)	impact may occur	impact may occur		
a. The proposed action will require a new, or an upgrade to an existing, substation.	Question(s) D2k	-	- •		
 a. The proposed action will require a new, or an upgrade to an existing, substation. b. The proposed action will require the creation or extension of an energy transmission or supply system to serve more than 50 single or two-family residences or to serve a commercial or industrial use. 		may occur	occur

PRINT FULL FORM

Full Environmental Assessment Form Part 3 - Evaluation of the Magnitude and Importance of Project Impacts and Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Impact on Land

The Proposed Action may result in increased erosion from the physical disturbance of 18.7 acres of land and vegetation removal.

Impact on Surface Water

The Proposed Action will occur within and beneath freshwater wetlands.

Impact on Plants and Animals

The Proposed Action will occur within and will temporarily remove habitat for the New York State endangered eastern tiger salamander. The temporary removal of habitat will require a Part 182 Incidental Take Permit from the NYSDEC.

Impact on Historic and Archaeological Resources

The Proposed Action is partially located within an archaeologically sensitive area. The Proposed Action will remove and permanently alter subsoils in an archaeologically sensitive area.

Impact on Noise, Odor and Light

Temporary increase in noise levels associated with construction activities associated with the Proposed Action will occur in areas surrounded by vacant wooded land with low background ambient noise.

	Determination	of Significance -	Type 1 and U	nlisted Actions
SEQR Status:	Type 1	Unlisted		
Identify portions of EAF	completed for this Proje	ect: 🖌 Part 1	Part 2	Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the Long Island Power Authority as lead agency that: A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued. B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency: There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)). \checkmark C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued. Name of Action: Bridgehampton to Buell (BTB) - New 69kV Underground Cable Project Name of Lead Agency: Long Island Power Authority Name of Responsible Officer in Lead Agency: Rick Shansky Title of Responsible Officer: Senior Vice President of Power Supply and Wholesale Markets Signature of Responsible Officer in Lead Agency: /s/ Rick Shansky Date: April 6, 2021 Signature of Preparer (if different from Responsible Officer) < Date: 3/30/21 For Further Information: Contact Person: Erin Gorman Address: 175 East Old Country Road Hicksville, New York 11801 Telephone Number: (800)490-0025 E-mail: PSEG-LI-B2BSEQR@pseg.com For Type 1 Actions and Conditioned Negative Declarations, a copy of this Notice is sent to: Chief Executive Officer of the political subdivision in which the action will be principally located (e.g., Town / City / Village of) Other involved agencies (if any) Applicant (if any)

SUPPLEMENTAL INFORMATION SHEET Bridgehampton to Buell (BTB) New 69kV Underground Transmission Cable

Description of the Proposed Action

The Proposed Action is the installation of a new underground 69kV transmission cable from the Bridgehampton Substation located on Bridgehampton-Sag Harbor Turnpike in the Town of Southampton to the Buell Substation located on Cove Hollow Road in the Town of East Hampton (approximately 5.2 miles). The new underground cable is designed to be installed below grade within the existing LIPA owned and/or controlled overhead right-of-way (ROW). Existing overhead circuits are currently located within the ROW and will remain under the Proposed Action. The Proposed Action is intended to address transmission system constraints resulting from increased load demand from customers on the South Fork of Long Island.

In addition to the underground cable, fourteen manholes will be installed along the Proposed Action route. Approximately 4,000 linear feet of the cable extending east from the Bridgehampton Substation to the west side of Widow Gavits Road will be installed via horizontal directional drill (HDD) with a single manhole installed within the previously disturbed area west of Widow Gavits Road. Approximately 100 linear feet of the cable located west of Cove Hollow Road and beneath the LIRR will be installed via jack & bore. The remaining portions of cable installation will be installed via trenching.

To facilitate the temporary use of HDD equipment and pipe laydown during construction, a 0.9 acre portion of the LIPA owned and/or controlled overhead ROW north of the existing Bridgehampton Substation will be cleared; a 0.36 acre portion of the cleared area will also require grading to facilitate construction. A single manhole will be located within this cleared area. Approximately 0.31 acres of clearing and 0.11 acres of grading within the area north of the existing Bridgehampton substation will occur within 535' of a known Tiger Salamander breeding pond. Due to the potential temporary loss of habitat, a Part 182 Incidental Take permit will be required. PSEG Long Island is currently discussing with the New York State Department of Environmental Conservation (NYSDEC) appropriate mitigation measures, which will ensure a net conservation benefit to the species is achieved upon completion of the Proposed Action. Potential mitigation measures include, but are not limited to, the installation of a Tiger Salamander culvert to connect existing fragmented habitats.

Additionally, portions of the ROW may require stabilization in order to allow machinery access for the installation of the underground cable and manholes. Stabilization may include grading or excavation of existing soils and temporary placement of Recycled Concrete Aggregate (RCA).
