

New Transmission Line for the Rockaways

Continuing Our Work to Improve Reliability for Our Communities

Subway Station at Beach 105th Street

Our Mission

To build an industry leading electric service company that places safety first, in all we do, providing our customers across Long Island and the Rockaways with:

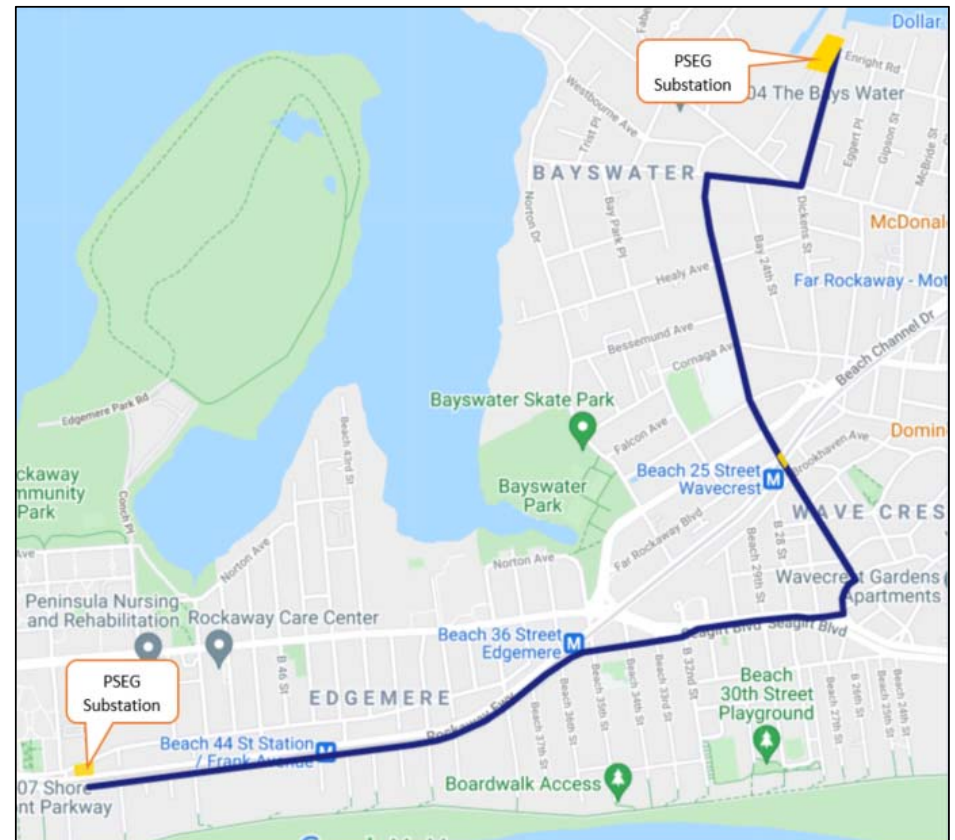

- Excellent customer service
- Best in class electric reliability and storm response
- Opportunities for energy efficiency and renewables
- Local, caring, and committed employees, dedicated to giving back to their communities

One new transmission line already installed in the Rockaways

Between PSEG Long Island substations near Bay 24th Street and Beach 53rd Street.

Completed November 2022

Why are these projects needed?

Peak load at the substations near Beach 108th Street and Beach 53rd Street is projected to increase

+50% by 2032

- There is a recognized need to support existing customer load, increase reliability and plan for future load growth
- The transmission lines will also contribute to the development of a robust and adaptable grid to facilitate renewable technologies

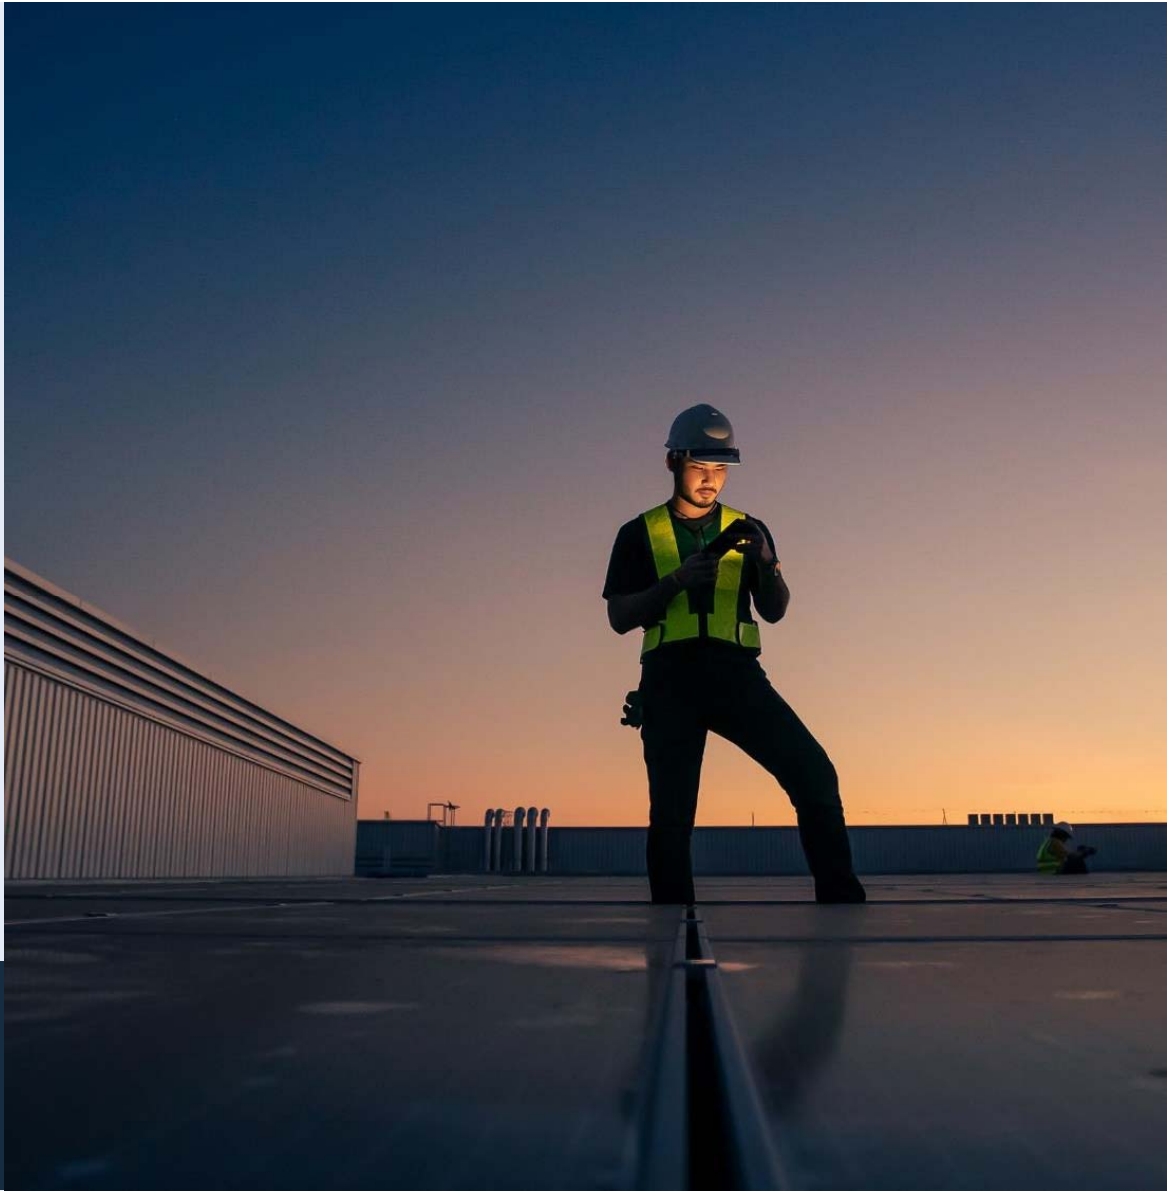

What are the benefits of both of these projects?

- Ensure reliable electric service for the Rockaways
- Address current and future load growth needs
- Enhance ability to provide uninterrupted service during extreme weather like heat waves or storms
- Relieve load and capacity challenges on surrounding substations while providing increased contingency capacity for the area
- Increase electric capacity in the area to allow for routine and necessary system maintenance

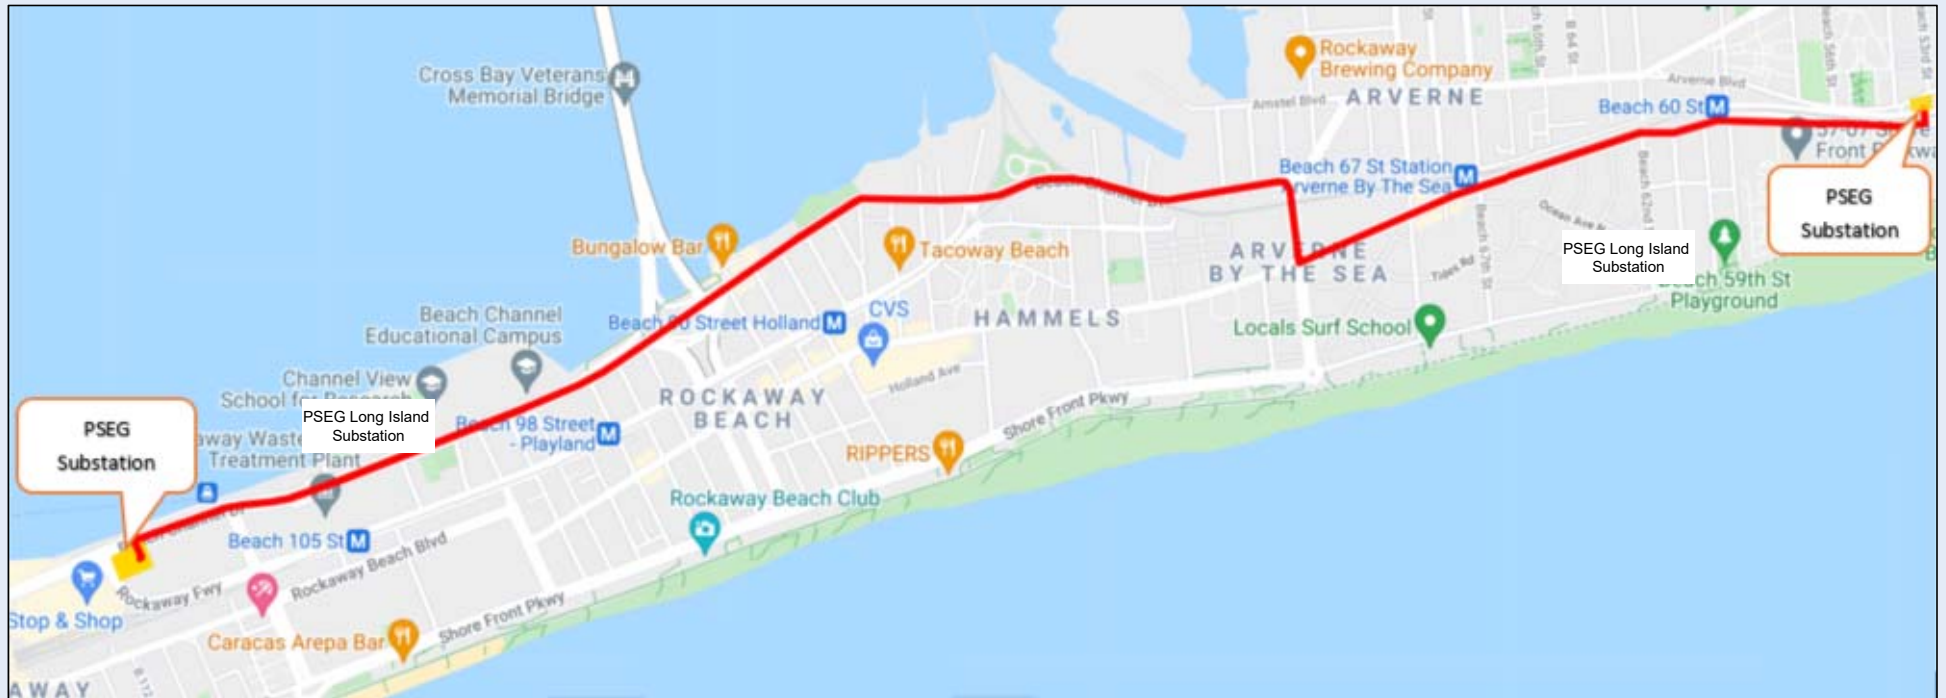

New Transmission Line for the Rockaways

Second Transmission Line

Project Route: Beach 53rd Street to Beach 108th Street

Timeline

June 2023 - November 2023

- Construction along the route
- Final restoration work

December 2023 – February 2024

- Connect equipment at the substation
- Test and energize equipment at the substation

PSEG Long Island will provide cones, flaggers and signage at the work sites

Community Outreach

- **Customer notification to those within the vicinity of project:**
 - Letters
 - Robocalls - for planned outages
 - Email and text messages - as needed
- **Dedicated webpage providing project details**
