TrickleStar Tier II Advanced Power Strip

This power strip supplements the load sensing capabilities of a Tier I APS with IR signal detection from your remote control and motion-sensing. Thus, even if your television is on, but no one appears to be nearby, after an adjustable period of time the TV and peripherals will all shut off, maximizing your energy savings.

R7005.615 | APS+ | Pre-rebate \$44.95 | **\$24.95**

Tier I Advanced Power Strip

This powerstrip not only safeguards your equipment from damaging power surges, it helps lower your electric bill. This power strip not only safeguards you equipment from power surges, but it also helps lower your electric bill. This 7 outlet model offers 2 always-on outlets, 1 master outlet, and 4 controlled outlets. When the master device (typically a television or computer) is powered off, the controlled devices will also automatically power off, eliminating phantom loads.

R7005.609 | 7-Outlet APS | Pre-rebate \$16.95 | **\$8.48**

R7700.102 | 7w Black DeskLamp | Pre-rebate \$15.95 | **\$13.95**

Connected Home

A smart home lets you connect devices that offer you both convenience and safety, and can even help you save money on your energy bills.

Smart home technology can learn your lifestyle and adjust your thermostat and lights, based on when you're home and awake. Home monitoring systems make it easy for you to keep an eye out when you're not home.

Adding an outlet control to your home will let you control your lighting, electronics and appliances from your smartphone or tablet.

Smart lighting products let you turn your lights on and off from almost anywhere, or program a timer to gradually increase light intensity to ease you out of sleep.
