NEWSLETTER

Stay in the know with the latest program updates, helpful tools, and important reminders to support your work. Whether you're in the field or behind the scenes, we're here to help you deliver energy-efficient comfort to every customer. PSEG Long Island's **home efficiency programs** provide customers with a free whole-house energy assessment, unlocking opportunities for energy-efficient upgrades and long-term savings.

Partner with PSEG Long Island through the **Home Comfort, Home Performance**, and **Commercial Efficiency** programs to deliver top-tier home and business energy upgrades. As a partner, you'll have access to incentives and resources to grow your business and reach more customers. Not a Partner? Enroll today by completing the PSEG Long Island **Online Partner Application**.
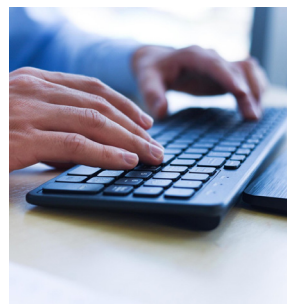

KEY DEVELOPMENT

INTRODUCING BPI'S CCASHP ASSESSOR CERTIFICATE OF KNOWLEDGE

BPI has announced its newest credential, developed in collaboration with TRC: The Cold Climate Air Source Heat Pump (ccASHP) Assessor Certificate of Knowledge. By taking a whole-house approach, ccASHP Assessors ensure that cold climate heat pumps are properly matched to each home, maximizing impact for homeowners, utilities, and energy programs alike. Join the growing network of professionals driving the future of efficient, sustainable homes. Learn more and earn yours at **bpi.org**

2026 PARTNER RE-ENROLLMENT UPDATE

PSEG Long Island is pleased to announce the **2026 Home Comfort** and **Home Performance Program** Re-Enrollment is now open. Communications was sent to partners directly so their Officers can update company details, renew licenses, and re-enroll for the 2026 Programs through the Partner Portal. Stay connected and continue to benefit from program resources, training, and opportunities that support your business and customers. Learn more and get started **here**.

KEY DEVELOPMENT

NEW YORK'S ALL-ELECTRIC BUILDING LAW DELAYED

As of mid-November 2025, Governor Hochul's administration agreed to delay enforcement of the All-Electric Buildings Act. This was formalized through a stipulation filed in U.S. District Court. The law prohibits the installation of fossil fuel-burning equipment in most new construction projects, requiring them to rely entirely on electricity for heating, cooling, hot water, and cooking. The state cited that the reason for the delay is ongoing federal litigation challenging the law. Plaintiffs argue that the Act is preempted by the federal Energy Policy and Conservation Act (EPCA), which regulates appliance efficiency standards at the national level. No specific new enforcement date has been set. Implementation is paused pending the appeals court's decision.
