COMFORT

NEWSLETTER

Stay in the know with the latest program updates, helpful tools, and important reminders to support your work. Whether you're in the field or behind the scenes, we're here to help you deliver energy-efficient comfort to every customer. PSEG Long Island's **home efficiency programs** offer everything from free assessments to upgrades based on income-eligibility.

Partner with PSEG Long Island through the **Home Comfort**, **Home Performance**, and **Commercial Efficiency** programs to deliver top-tier home and business energy upgrades. As a partner, you'll have access to incentives and resources to grow your business and reach more customers. Not a Partner? Enroll today by completing the PSEG Long Island [Online Partner Application](#).

KEY DEVELOPMENT

YOUR INPUT MATTERS AND SO DO NEW SAVINGS OPPORTUNITIES

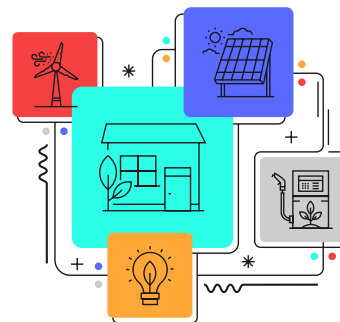

A BIG THANK YOU to all the program partners who joined our Whole House Roundtable on October 8, both in person and online! We appreciate the time you took to share your thoughts and complete our survey. Your feedback helps us identify ways to better support

your participation and expand incentive opportunities heading into Q4 and 2026.

Are there rate incentives for using a heat pump? Yes! If the heat pump is the primary source of heat for a home, customers are eligible for a **Residential Electric Heating Rate** (580) from PSEG Long Island. From October through May, this rate provides a 40% energy delivery charge discount for all usage above 400k Wh/month. [Visit](#) PSEG Long Island to learn more about current electric rates.

FEDERAL ENERGY SAVINGS YOU CAN CLAIM BEFORE 2025 ENDS

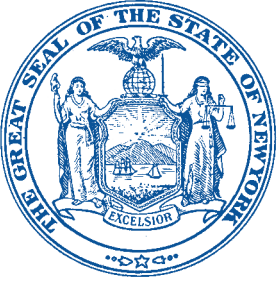

Homeowners can claim up to **\$3,200 in federal tax credits** for energy-efficient upgrades through **December 31, 2025**, under the Inflation Reduction Act. The **Energy Efficient Home Improvement Credit** covers 30% of

eligible costs, up to \$1,200 for insulation and electrical upgrades. Plus, \$2,000 for heat pumps and heat pump water heaters. The **Residential Clean Energy Credit** offers 30% back on systems like geothermal heat pumps and battery storage. All items must be placed in service by the deadline. You must have a tax bill to benefit, which may not be the case for certain low-income households.

KEY DEVELOPMENT

\$5.36 BILLION TOWARD A MORE EFFICIENT AND EQUITABLE NEW YORK

New York's Bold **2026–2030 Energy Efficiency & Building Electrification Plan**. In May 2025, the New York Public Service Commission approved \$5.36 billion in new efficiency and electrification portfolios to deliver lifetime savings of 615 trillion BTUs (equivalent). An estimated \$1.6 billion is dedicated to low to moderate income households. The plan shifts from traditional rebates to weatherization and building envelope upgrades, introduces a Strategic Framework for deeper, longer-term impacts, and replaces utility performance incentives with stronger regulatory oversight. New York's focus is on equitable building improvements that advance its clean energy and climate goals.

UPCOMING INDUSTRY TRAINING AND EVENTS
