# Oil boiler *replacement*

“HVAC Pro Solutions was very easy to work with. Mike N. provided excellent customer service, pricing and completed the project in very little time. The PSEG Long Island Home Comfort Application process was fairly easy because HVAC Pro Solutions was very knowledgeable and helped us get our rebate.”

—F. Stock

## Featured Partner

HVAC Pro Solutions installed a combination of ducted and ductless cold climate air source heat pumps, an energy efficient heat pump water heater, and a dual fuel smart thermostat. The Partner worked with the homeowner to explain the benefits of Air Source Heat Pump Technology and leveraged the Home Comfort Program’s rebates. The homeowner will also enjoy the benefits of the Electric Heat Rate Code. To further maximize the positive impacts to the customer, HVAC Pro Solutions also removed the existing oil boiler to reduce the customer’s reliance on fossil fuel and provide a total cleaner and greener solution for space heating and cooling and water heating.
