

## Residential Project Overview

### HOME DETAILS

- Great Neck, NY
- 2,000 Square Feet
- Cape

## Estimated Project Savings

**ANNUAL FUEL SAVINGS:**  
\$200<sup>1</sup>

**10-YEAR PROJECTED SAVINGS:**  
\$3,500

# New Construction *solution*

“We had a great experience working with HVAC Pro Solutions. Mike Nikfar made it easy, and the application was taken care of completely and included in the price. We are very happy and comfortable with the heating and cooling system installed; it is extremely efficient! Summer used to be a struggle with the energy costs of our old system. It was never able to maintain the temperature it does now. The application process was sufficient, it was effective and seamless. I was also very happy with the rebate amount I received. I have been recommending HVAC Pro Solutions and the PSEG Long Island Home Comfort Program to friends and family, and I will continue to do so.”

—David L.

## Featured Partner

HVAC Pro Solutions installed a combination of Bosch and Fujitsu ducted and ductless cold climate air source heat pumps and a dual fuel smart thermostat. The equipment selected is ideal for this new construction scenario and delivers maximum efficiency while minimizing sound levels. HVAC Pro Solutions worked with the homeowner to explain the benefits of Air Source Heat Pump technology and leveraged the Home Comfort Program’s rebates. PSEG Long Island also moved the homeowner to the Electric Heat Rate code which is lower than the standard customer electric rates.
